Local Authority Parking Finances in England 2019 - 20

1 Introduction

This report uses the DLUHC (formerly DCLG and MHCLG) tables on parking income and expenditure for the period from 2015-16 to 2019-20 (UK Government (2019e)). All councils are required to report their financial information to government, in a consistent format, although there may be some differences in interpretation of what that format is and what it covers. Earlier, councils also submitted budgets for the 2020-21 financial year but on a less detailed basis (UK Government (2020)). These figures are included where appropriate. The figures have to be on an as-received cash basis without any provision for bad debts or any allowance for capital charges (interest or deprecation).¹

This report covers 332 local authorities in England but excludes the national parks which declare parking income.

The income and cost headings used in this analysis are:

- 1. On-street income, expenditure
- 2. Off-street income, expenditure
- 3. Total transport income, expenditure

The accuracy of this analysis depends on the accuracy with which local authorities complete the annual financial returns they make to central government and upon which this assessment is based. These headings do not always agree with accounts published by local authorities because of their different treatment of overheads and allocation of surpluses to other transport projects. In particular, the data around the COVID pandemic have led to significantly fluctuations in parking income and expenditure and this leads to some of the figures for year-to-year changes appearing quite extreme. Consequently readers of the report are asked to rely on their own judgement regarding the usefulness of the data presented here.

¹The report also includes calculations using data on income, expenditure and budgets for previous financial years (UK Government (2017a), UK Government (2017b), UK Government (2019a), UK Government (2019b), UK Government (2016), UK Government (2017c), UK Government (2018), UK Government (2019d)).

2 Summary

Table 1: Summary of parking accounts for England (£ millions)

		2015-16	2016-17	2017-18	2018-19	2019-20	2019-20 budget	2020-21 budget	Change 2019-20 on 2018-19
	Total Income	1	872	933	994	1,020			2.5%
On-street	Expenditure	2	401	417	427	454			6.5%
	Surplus	-0	471	516	568	565			-0.4%
	Total Income	3	625	638	679	711			4.7%
Off-street	Expenditure	1	309	316	348	385			10.9%
-	Surplus	2	316	322	331	325			-1.7%
	Total Income	4	1,496	1,571	1,673	1,730			3.4%
All parking	Expenditure	3	709	733	774	840			8.4%
	Surplus	1	787	838	899	891	885	918	-0.9%
All England transport	Net Expenditure		4,013	3,997	3,857	3,757	4,864	3,915	-2.6%
	Parking surplus as percentage of net transport expenditure	NA%	19.6%	21.0%	23.3%	23.7%	18.2%	23.5%	

^{*} Cells may not add up exactly due to rounding.

Total income from parking in 2019-20 in England was £1.73 billion, 3.4% higher than in 2018-19. On-street income rose by 2.5% and off-street income by 4.7%. Expenditure rose by 6.5% for on-street and by 10.9% for off-street parking. As a result, the combined surplus from both on- and off-street parking was £891 million, 0.9% lower than the previous financial year and 65261.0% higher than four years ago.

Local authorities exceeded their 2019-20 budgeted surplus of £885 million by 0.7%. Their budgeted surplus for this next financial year (2020-21) is £918 million, 3.1% higher than the actual for 2019-20. If the 2020-21 budget is exceeded by the same proportion as the 2019-20 outcome, then total parking surpluses would amount to £925 million.

The on-street parking surpluses must, by law, be used for transport projects. Overall, local transport net expenditure in 2019-20 fell to £3.8 billion. Without the contribution from parking surpluses, net expenditure would have been 23.7% lower.

Table 2: Summary of parking accounts for England by region (£ millions)

		London	Rest of England	All of England	London percentage
	On-street	683	337	1,020	67.0%

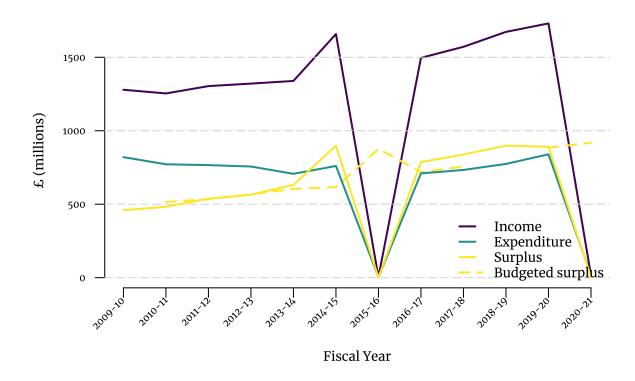

Figure 1: Parking revenues–England

Table 3: Comparison of parking income and expenditure across the nations of Great Britain (£ millions, latest year available)

	England without London	London	Scotland	Wales	Great Britain
Fiscal year	(2019-20)	(2019-20)	(2019-20)	(2019-20)	(2019-20)
Parking income	1007.5	726.7	92.8	43.0	1870.0
Parking expenditure	559.8	281.6	43.5	-15.4	869.5
Surplus	447.7	445.1	49.3	58.4	1000.5
Surplus as proportion of income	44.4%	61.3%	53.1%	135.8%	53.5%

Table 3 provides a comparison between London, England excluding London, Wales, and Scotland for the most recent available data, while Table 4 compares the changes between 2019-20 and the previous year, with the average annual change over the four-year period starting in 2015-16 (or the most recent four-year period for which data is available). In the last year the surpluses for London have decreased by 2.0%, which is NA than the average annual increase observed over the preceding four years, which was NA%. For the rest of England excluding London the surpluses have increased by 0.3%, which is less than the four-year average annual increase at 325.7%.

On average, parking surpluses in Great Britain have risen by about -0.5% annually over the four years for which data are available compared with 2.8% annually for the Retail Prices Index during the same period (Office for National Statistics (2023)).

Table 4: Changes in parking income and expenditure over previous four years (from most recent year available) across the nations of Great Britain

	England without London	London	Scotland	Wales	Great Britain
Most recent year available	(2019-20)	(2019-20)	(2019-20)	(2019-20)	(2019-20)

Average annual change in expenditure Change in expenditure since previous year	277.9% 11.5%	NA% 2.9%	2.4% 4.7%	NaN% -4.2%	91.8% 8.6%
Average annual change in surplus Change in surplus since previous year	325.7% 0.3%	NA% -2.0%	6.6% $4.9%$	43.4% $0.7%$	108.1% -0.5%

3 Income

Parking income is derived from three main sources: meter income (including ticket machines and apps), residents' and business permits, and penalties. Other sources are towing and storage charges although relatively few councils operate pounds now. Total income in 2019-20 was £1,730 million, 3.4% higher than in 2018-19. In London boroughs the total income was £727 million, -0.2% more than in the previous year, while the total for the rest of England was £1.0 billion, 6.2% more than in the previous year.

Table 5 shows the incomes for all the London boroughs for the previous 5 years, their most recent annual change and the average annual change in income over the preceding 5 years. Table 6 has the same information for the top 20 councils outside of London. For a full table of all the local authorities in London see Table 13 in the Appendix.

In England as a whole 149 councils increased their income over the past year and 162 decreased their income. Another 16 councils' incomes stayed the same. There are seven councils that did not report income data in this or the previous fiscal year, so we cannot define the change.

The top three English councils by income were Westminster, Kensington & Chelsea, and Camden, and between them accounted for 10.2% of parking income.

The three councils which had the largest year-on-year percentage increases in income were Plymouth (up 659.6%), West Lancashire (up 173.5%) and Eastbourne (up 128.2%). The biggest decreases were in South Oxfordshire (198.8%), and Buckinghamshire (84.5%) (excluding Surrey Heath, Cherwell, Melton, and Rossendale where income was under £30,000).

4 Expenditure

Overall expenditure on parking rose to £840 million, up 8.4% from 2018-19 for both onstreet and off-street. Expenditure in London went up by 2.9% and up by 11.5% in the rest of England. Expenditure represents 44.5% of income for on-street parking and 54.2% for off-street.

Table 7 ranks the London boroughs in terms of expenditure on parking while Table 8 lists the top 20 English councils outside London. See Table 14 in the Appendix for a comprehensive list of all 353 local authorities in England.

Overall expenditure has risen by £65 million (8.4%) after a rise of £41 million last year.

In England as a whole 216 councils increased their expenditures over the past year and 100 decreased them. Another 11 councils' expenditures stayed the same. There are seven councils that did not report expenditure data in this or the previous fiscal year, so we cannot define the change.

The top three English councils by expenditure were Lambeth, Ealing, and Camden, and between them accounted for 6.2% of parking expenditure in the country.

The largest increase in expenditure in England occurred in Plymouth where it increased by 28237.2% while Eastbourne and Southampton increased by 557.3% and 539.2% respectively. The biggest decreases were in Selby (242.7%), and Westminster (72.3%) (excluding Surrey Heath, Cherwell, and Melton with expenditure under £30,000).

5 Surpluses

In total, councils in England made a surplus of £891 million in 2019-20, 0.9% lower than in 2018-19. Of this total, £445 million (50.0%) came from London and £446 million from the rest of England. This excludes a £1.9 million surplus from parking in National Parks. Money from any workplace parking levy schemes is excluded from the analysis for the sake of clear comparison between local authorities. It is currently unique to Nottingham.

The total *surpluses* for London amounted to £445.1 million between 33 authorities, of which the top three–Westminster, Kensington & Chelsea, and Camden–accounted for 30.9%.

No London councils made a loss last year (see Table 11).

Overall, parking contributed £445.1 million to local authority finances in London in 2019-20 compared with £454.4 million in 2019-20, an increase of -2.0%.

Enfield increased their surplus by 62.4% while Croydon and Southwark increased by 17.7% and 17.0% respectively. The biggest decreases were in Ealing (69.1%), and Hounslow (40.3%).

None of the London boroughs has had a deficit two years in a row.

Local Authority	2015-16	2016-17	2017-18	2018-19	2019-20	Change 2019-20 on 2018-19
Southend-on-Sea Sheffield		4.5 4.0	4.8 3.5	5.1 3.6	5.1 5.0	0.1% $37.5%$
Total deficit Total surplus	1.4	-6.7 415.3	-5.4 437.3	-8.4 452.8	-13.8 459.6	64.9% 1.5%
All England excl. London	1.4	408.5	431.9	444.4	445.7	0.3%

The total surplus from parking outside London of £446 million in 2019-20 was 0.3% higher than in 2018-19. Brighton & Hove was the highest earning council outside London, ranking as the seventh largest nationally, and with a surplus in 2019-20 of £24.8 million, 4.8% lower than in 2018-19. Table 12 lists the top 20 councils outside of London. The full table for all English councils is available in the Appendix as Table 16 .

The total *surpluses* outside London amounted to £904.7 million between 249 authorities, of which the top three–Brighton & Hove, Nottingham, and Birmingham–accounted for 12.2%. 50 councils made a loss with the total of parking deficits rising to £13.8 million from £8.4 million last year.

South Norfolk increased their surplus by 600.0% while West Lancashire and Welwyn Hatfield increased by 317.0% and 198.1% respectively (excluding Corby with a surplus under £30,000). The biggest decreases were in Wigan (80.4%), and Selby (76.9%) (excluding Nottinghamshire, Cherwell, and Melton with a surplus under £30,000).

West Oxfordshire increased their deficits by 971.4% while Cumbria and North Yorkshire increased by 730.8% and 662.3% respectively The biggest decreases were in Northumberland (88.8%), and Slough (87.6%) (excluding Forest of Dean with a deficit under £30,000)
