Local Authority Parking Finances in Wales 2016 - 17

1 Introduction

This note covers parking finances for the 22 local authorities in Wales. As in England and Scotland, local authorities are required to submit details of all their finances to the Welsh Government in a standard format. They are normally published in October, seven months after the financial year end. This report looks at the section on parking income and expenditure from 2012-13 to 2016-17 and is based primarily on data reported by Statistics for Wales (Welsh Government (2018)), as well as data reported by English and Scotish Local Government authorities, all of the sources of which are listed in the references.¹

The published data is less comprehensive than in England and does not split out on- and off-street parking or show penalty income separately. The figures do not include any commercial off-street parking. In 2016-17, 19 councils showed surpluses and three showed deficits (the same three councils as 2015-16). All councils are now receiving income from parking, although councils such as Blaenau Gwent (Ebbw Vale and Abertillery) and Torfaen (Pontypool and Cwmbran) offer free parking but still issue penalty charge notices.

parking. The income has increased by 4.4~%, the expenditure has increased by 6.5~% and the surplus has increased by 1.2~% compared to the previous fiscal year. Total transport has fallen by 0.3~% and the surplus now represents 5.2~% of transport costs.

Parking makes a smaller contribution to overall transport expenditure in Wales compared with England where it is around 20.5 % of total transport. Since 2012-13 income has risen by 23.0 % and expenditure has risen by 7.7 %. Over the same period the surplus has risen by 61.3 %. Figure 1 gives a longer term overview of the trends in incomes, expenditures and surpluses.

On average, parking surpluses in Great Britain have risen by about 8.6 % annually over the past four years compared with 1.9 % annually for the Retail Prices Index during the same period (Office for National Statistics (2019a)).

3 Income

Total council parking income from all sources in 2016-17 was £37.4 million, 4.4 % higher than 2015-16. Note that this includes penalty income, which is not shown separately, but does not include off-street income received by commercial off-street parking facilities. Table 4 ranks the Welsh councils in terms of parking income.

16 councils increased their income over the past year and six decreased their income. The changes from 2015-16 are mapped² in Figure 2.

The top three Welsh councils by income were Cardiff, Swansea, and Carmarthenshire, and between them accounted for 43.7~% of parking income.

Flintshire increased their income by 36.4 % while Denbighshire and Isle of Anglesey increased by 31.6 % and 15.7 % respectively (excluding Torfaen with income under £30,000). The biggest decreases were in Merthyr Tydfil (11.9 %), and Bridgend (7.6 %).

4 Expenditure

Table 5 ranks the councils in terms of expenditure on parking.

Overall expenditure has risen by £1.4 million (6.5 %) after a rise of £0.2 million last year, with 17 councils having increased their costs and five having reduced their costs. The changes from 2015-16 are mapped in Figure 4.

The largest increase in expenditure occurred in Blaenau Gwent where it increased by 154.4 % while Wrexham and Caerphilly increased by 44.4 % and 28.5 % respectively. The biggest decreases were in Ceredigion (39.0 %), and Flintshire (15.8 %).

The table also shows the proportion of income taken up by costs in 2016-17. Nationally in Wales it is 62.6 % with Cardiff at 51.9 %.

Table 6 shows the proportion of income taken up by expenditure. Across Wales it was 62.6% compared to 61.4% in the previous year, suggesting declining efficiency in operations.

Cardiff's expenditure was 51.9~% of its income having risen since last year, while Swansea's has risen to 56.5~%.

Most of the medium-sized councils spend 50–90% of their income on parking management, which includes enforcement. Care should be taken in interpreting the percentages towards the bottom of the table, as the very low parking incomes can lead to extreme values which are less meaningful.

5 Surpluses

Table 7 shows the parking surpluses from from 2012-13 to 2016-17 and the change from 2015-16 to 2016-17. It also shows the proportion that parking surpluses represent of total transport expenditure.

The total *surpluses* for Wales amounted to £15.0 million between 19 authorities of which Cardiff, Swansea, and Gwynedd contributed 49.8%. Three councils made a loss with the total of parking deficits rising to £1.0 million from £0.8 million last year.

Overall, parking contributed £14.0 million to local authority finances in Wales in 2016-17 compared with £13.8 million in 2016-17, an increase of 1.2 %.

Ceredigion increased their surplus by 3178.0 % while Blaenau Gwent and Denbighshire increased by 169.4 % and 43.7 % respectively. The biggest decreases were in Flintshire (69.9 %), and Wrexham (56.9 %) (excluding Caerphilly, and Newport with a surplus/deficit under £30,000).
